

Thank you for purchasing a set of Summit Luxury Internal Thermal Blinds we hope you are very happy with your purchase.

### **IMPORTANT INFORMATION:**

Please read before fitting your new thermal blinds

**Under no circumstances should your vehicle be driven or moved with any of the thermal blinds in place on the windows and obscuring the field of vision.**

### **TO FIT YOUR SUMMIT LUXURY INTERNAL THERMAL BLINDS**

For all applications the thermal blinds will be positioned with the silver foil side against the window and facing outwards. Before using your blinds clean the suction cups with warm, soapy water. Ensure that you dry them thoroughly before using. Ensure that your windows are clean, dry and free from grease or polish. Insert the stem of the suction cup into the black plastic holder on the thermal blind. Line up the blind to the window with the foil side pointing outwards, making sure that the blind is flat and there are no folded corners or slack material. Press the suction cups firmly onto the window for a few seconds each time. This should ensure a secure vacuum and the blinds will remain in place until removed.

### **TO REMOVE YOUR SUMMIT LUXURY INTERNAL THERMAL BLINDS**

To remove the blinds, simply pull the blinds away. The suction cups will remain in place. Then lift the small tab on the side of the suction cup to remove each one.
